

# Blue on Blue

## a new magnet for the north

Peppers Blue on Blue Resort exudes the essence of Queensland island holidays — its peaceful surroundings offering guests the perfect setting to unwind.

**G**racing one of the state's most beautiful lifestyle destinations — Magnetic Island — the property is located on the water's edge overlooking a private marina and spectacular Nelly Bay.

Resort General Manager Chris Owen said Peppers Blue on Blue was an exciting new product that would attract visitors looking for a unique and special island experience.

"Magnetic Island has been a hidden treasure for such a long time and with recent developments including Peppers Blue on Blue Resort, the whole place is opening up for more people to discover," he said.

"The resort is very contemporary in

design with 158 guest rooms, including two and three-bedroom suites and penthouses - some with their own private plunge pools.

"We wanted the ambience to be completely at one with the environment and the island's distinctive rock formations inspired the finishes and fittings, which reflect the natural tones of driftwood and granite."

Set in lush tropical landscaped surrounds, resort guests can spend their days rejuvenating in the large saltwater swimming lagoon and spa, or indulging in a selection of therapeutic and beauty treatments at the day spa.

The resort's signature Boardwalk Restaurant and Bar offers diners a

sensational fresh tropical menu and selection of fine wines.

Home to a national park with bushwalking tracks, beautiful untouched beaches and bays with pristine blue water, Magnetic Island is a natural wonder within close reach of the Great Barrier Reef.

With a new private marina facility and ferry terminal, visitors only have to step from the ferry or boat to their room.

"In every respect, the attention to quality and detail and the extraordinary natural surroundings combine to make Blue on Blue an exceptional experience." Mr Owen said.
